

Daedalus Icarus

This is about Daedalus, Icarus, Bob and the Minotaur. This is a Greek myth so it is not real.

Bob asked Daedalus and Icarus for a labyrinth for the Minotaur so it does not escape. The Minotaur is half man half

Bull. Seven young men and seven young women were fed to

the Minotaur every year. Daedalus and Icarus were put in with the Minotaur because he knew the way out. They did

get out but they were... trapped in a cave with a hole in the top.

Daedalus gave the birds bird seed to get some wings and he takes some feathers of them.

They were trapped in a cave so he made the wings but do not fly to close to the sun. But did Icarus listen, no, he flew higher and higher and higher and herher in till he reached the sun and the wax started to melt.

Drip drip drip with swoosh he fell into the water and he was dead.
