

## Technology Evening

On Thursday 9<sup>th</sup> February the school held a Technology Evening to showcase how modern technologies are used in school to support both learning and administration. There was lots to see and do including: how we use various websites to support learning; how the children in class 1 take their first steps into programming with Beetbots; The use of interactive whiteboards to make learning fun.

Upstairs we demonstrated various programming languages such as Flowol, Scratch and the use of Raspberry Pie mini-computers. All parents were encouraged to have a go with the software and hardware, especially the programming.

We were assisted on the evening by a number of our pupils who so expertly demonstrated things to parents. Those pupils were: Curtis, Millie, Isabel, Jake, Lexie, Justin, Cassie, Bella and Penny.

Thanks to all the staff and children who gave their time and also thank you to all those who came to see what was going on. There will be some more formal training events to follow soon. These will be on how to maximise DB and Espresso at home.
